Master Ship Repair from the Atlantic to the Pacific

GENERAL DYNAMICS
NASSCO

General Dynamics NASSCO, NASSCO-Norfolk, NASSCO-Mayport and NASSCO-Bremerton are Master Ship Repair contractors providing high quality and cost effective maintenance and modernization for the U.S. Navy on ships homeported in the San Diego, Mayport, Norfolk, and Bremerton areas.

Four Yards, One Mission, Readiness Delivered

NASSCO-Bremerton

Established in 2014 to support the company's (CVN) MSMO contract, NASSCO-Bremerton is the cornerstone of NASSCO's Pacific Northwest business operation. NASSCO-Bremerton has more than 27,000 square feet of industrial space located at 6000 Werner Road. NASSCO-Bremerton is also embedded within the Puget Sound Naval Shipyard (PSNS) in trailers located at Piers B and D.

NASSCO San Diego

NASSCO is the largest, full service shipyard on the West Coast of the United States, capable of maintaining or repairing any ocean-going vessel. Because of our location, expertise, and shipyard capabilities, NASSCO serves as a principal repair facility for the U.S. Navy's Pacific Fleet ships and is the prime contract holder for maintenance and modernization of LHA, LHD, and LCS class ships.

NASSCO-Norfolk

With two locations, Norfolk and Portsmouth, NASSCO-Norfolk is the consolidation of two great shipyards that have operated in the Port of Hampton Roads, Virginia, for more than 50 years - the former Metro Machine Corporation and the former Earl Industries.

NASSCO-Mayport

NASSCO-Mayport supports ships homeported and visiting the Mayport area, accomplishing availabilities on LCS, CG, DDG, LPD, LHD, and PC class ships as both a prime contractor and a subcontractor.
